

NORTH ISLAND MODEL A FORD CLUB INC

HUBLEY EVENING

WEDNESDAY 16 September 2026 6.30pm

4 Vernon Place, Papakura

Your Club has decided to hold a practice evening for Hubley racing. There are some members out there who are unaware of these magic 'toy' vehicles and the fun they can create.

One day many years ago, someone got the idea that it might be fun to "race" these model cars down a track. The Hubley was born and created a lot of fun using the die cast 1/20 scale metal models made by Hubley, Gabriel, and Scale Model. The format is side by side racing on a gravity 40ft three-lane track.

Bruce Stratton welcomes you to see his fantastic hubley track set up for you to practice on. So come along and race those hubley's. Our Hubley weekend is not far away and those cars need fine tuning.

Any enquiries please contact Terry Costello 027 492 0642 or email tcmodelanz@gmail.com

Buy yourself a Hubley and start racing. The fun that can be had from these cars is amazing.

The race is a great participant and spectator sport. The crowds really get involved in the runoffs and cheer for their favourites.

Please bring a plate of food, tea and coffee supplied.

Also bring a chair, it may be needed.
